

Drupal for Fun and Profit

Making a career out of Open Source

Khalid Baheyeldin

DrupalCon Boston

March 3, 2008

<http://2bits.com>

Agenda

- Introduction
- Definitions
- Open Source software licences
- Business models
- Drupal
 - product, project, community
- Drupal careers
- Contributing
- Questions, discussion

About 2bits.com

- Founded 1999
- Based in Waterloo, Ontario (Canada)
- Active member of the Drupal community since 2003
- 30+ contributed modules on drupal.org
- Listed on Drupal.org's service providers section
- Maintain modules that run on drupal.org (donations, feature, lists, fee, ...)
- Event sponsorship (DrupalCon, DrupalCamps)

2bits.com Services

- Clients mainly in the USA and Canada
- Subcontracting development projects
- Development/Customization of modules
- Performance tuning and optimization
- Installation, upgrades
- Automated backups

About Khalid

- IT development and consulting for 23 years
- Drupal since 2003
- Core contributions
 - Site maintenance feature
 - Logging and alerts in Drupal 6
 - Many patches
- Member of
 - Drupal Association
 - security/infrastructure teams
- Co-founder of 2bits.com, Inc.
- Blog at <http://baheyeldin.com>
- Contributed modules
 - Adsense
 - Userpoints
 - Job search
 - Favorite nodes
 - Flag content
 - Second Life
 - Stock API and module
 - Currency
 - Custom Error
 - Image watermark
 - Site menu
 - Email logging and alerts
 - Technorati
 - Click thru
 - Referral
 - Nodevote

Definitions

- Open Source
 - More inclusive / Less strict
 - Stresses availability
- Free software
 - More strict definition
 - Stresses liberty (freedom)
- Each has pros and cons

Cathedral vs. Bazaar

- Two different cultures
 - Competition vs. Collaboration
 - Win/Lose (Zero Sum) vs. Win/Win/Win
 - www.groklaw.net/pdf/Comes-3096.pdf (Slide 9)
 - Closed development vs. “Its all out in the open”
 - Slow/monolithic vs. Incremental/iterative
- Cathedral and the Bazaar (Eric Raymond)
 - http://en.wikipedia.org/wiki/The_Cathedral_and_the_Bazaar

Corporatitus?

- Do you have any of the following symptoms?
 - Your work is not noticed/appreciated?
 - Tired of office politics?
 - Hit the glass ceiling?
 - Too hierarchical for you?
 - Been there too long with little challenge?

Why Open Source?

- Reduce capital costs
 - You don't need to pay licenses for anything in the LAMP stack + Drupal
- Reduce ongoing costs
 - Many choices for maintenance (in house, consulting companies, freelancers, community)
- “Total Cost of Ownership” is in favor of Open Source (FUD notwithstanding)

Why Open Source?

- Customization
 - You don't need permission, fees, know how or special licenses
- Growth market
 - Lots of opportunities
- Easier to get noticed
 - Low barrier for entry
 - Marketing by doing (meritocracy) ...

Licence types

- BSD variants
 - “Do with it what you want, including closing it off”
 - Examples: NetBSD (Apple OS/X)
- GPL
 - “You cannot deprive users of freedoms you got”
 - Examples: Linux kernel, Drupal
- Web services “loophole”
 - Affero GPL license

Other licences

- Apache
 - GPL compatible
- Mozilla
 - “weak copyleft”
 - Can be linked/combined with proprietary code
- PHP
 - Non-GPL compatible
- Many others

Applicability

- In the Drupal community
 - Applies to “code”
 - Does not apply to graphics (themes)
- Ask the Drupal Association if in doubt
 - Contact form

Business Models

Many business models for Open Source

Selling solutions

- You don't sell the software, but sell the hardware that uses the software
- Many embedded devices use Linux
- Or sell an application
 - e.g. Google Appliance

Selling services

- Hosting
- Building web sites
- Theming
- Development
- Training (classes, videos)
- Books
- Performance

Drupal (as a product)

- Product
 - A tarball that you download and install
- Framework
 - “Content Management System”
 - “Web applications framework”
 - LEGO system for web sites

Drupal (as a project)

- Ever evolving
- Ever improving
- See next slide

Drupal (as a community)

- We (collectively) are the most important asset of Drupal
- We are the ones who improve it
- We are the ones who support it
- We are the ones who promote it

Drupal's community

- An ecosystem
 - Developers
 - Promoters
 - Adopters
- “Grow the pie”
 - Enough for everyone to get a slice

Drupal based services

Many Drupal based services

Development

- Writing modules to do special things, e.g.
 - “Scratch your own itch”
 - Something a client asks for
- Examples
 - Adding features
 - Integrating external sites/APIs

Development

- Two areas
 - Backend and/or Front end (user experience)
- Skills:
 - PHP
 - Drupal's API
 - MySQL/PostgreSQL
 - HTML, some CSS
 - Javascript
 - jQuery

Site building

- No programming knowledge needed
- Need to understand client requirements
- Need to know what modules are out there
- Putting them together to meet requirements
- Skills:
 - LAMP/WAMP (for deployment)
 - Keeping up to date with new modules and updates

Theming

- Customize look and feel
- From simple to quite complex
- Artistic inclination
- Skills:
 - HTML
 - CSS
 - graphics
 - Some PHP

Performance Optimization

- Two types
 - Make it faster for individual page loads
 - Make it handle more load (scalability)
- Backend
 - page generation time
- Front end
 - How user perceives the speed of page loading

Training

- Courses
- DVDs
- Webinars

You options?

- If you are an individual ...
 - Freelancing / Contracting
 - Low entry barrier
 - Start to partner with like minded people
 - Complementary skills
 - Join an enlightened shop
 - Your contributions can be the key

You options?

- If you are a company ...
 - Get involved
 - Being here today is a good first step
 - Promote Open Source to clients
 - For pragmatic reasons (it works, low cost, ...etc.)
 - Hire Open Source people
 - Can start with subcontracting
 - Let your work be known
 - Drupal showcase forum, blogs on Drupal Planet

Drupal's Seven Principles

<http://drupal.org/principles>

- (1) Modular and Extensible
- (2) Quality coding
- (3) Standards-based
- (4) Low resource demands
- (5) Open source
- (6) Ease of use
- (7) Collaboration**

Contribute!

- Contribute your code
 - Better for you as an free lancer/consulting shop
 - Better for your client too
- You get:
 - Bug fixes
 - Features
 - Upgrades

Contribute!

- It is not only about “code”
 - Documentation
 - Advocacy/Marketing
 - Event organizing
 - Fundraising
 - Many others ...

Contribute!

- It is fun!
- It is very rewarding!
- It is addicting!
- And it is free (at least the “first commit” is ...)

Contribute!

- Remember: Drupal is an Ecosystem
 - Symbiosis is the most mutually beneficial relationship
 - Other forms are not of mutual benefit (one sided or even parasitic)
- Give a little, get a lot ...
